

# SHRESTH SENWAL

Software Engineering Intern — Full Stack Developer

✉ shresth.senwal@gmail.com — 📞 +91 9999885717 — 🌐 Github — 🌐 Portfolio

## SUMMARY

Results-driven software engineering student with hands-on experience in **full-stack development**, **AI/ML**, and **distributed systems**. Demonstrated ability to build scalable applications using modern frameworks and deliver production-ready solutions. Strong foundation in **IoT systems**, **system design**, and **agile methodologies**. Seeking software engineering internship to contribute technical expertise and collaborative problem-solving skills.

## EDUCATION

### B.Tech, Information Technology

Expected May 2027

Manipal University Jaipur

*Relevant Coursework: IoT Systems, Database Management Systems, Operating Systems, Software Engineering, Object-Oriented Programming, Computer Networks, Distributed Systems*

## TECHNICAL SKILLS

|                        |                                                                                                  |
|------------------------|--------------------------------------------------------------------------------------------------|
| <b>Languages</b>       | Python, Java, JavaScript, TypeScript, C++, SQL, HTML/CSS                                         |
| <b>Frameworks</b>      | React, Next.js, Node.js, Express.js, Flask, PyTorch, TensorFlow                                  |
| <b>Developer Tools</b> | Git, GitHub, Docker, VS Code, Postman, CI/CD, Jest, Linux/Unix                                   |
| <b>Technologies</b>    | RESTful APIs, GraphQL, MongoDB, PostgreSQL, Firebase, AWS, Microservices, WebSockets, OAuth, JWT |

## WORK EXPERIENCE

### Generative AI Engineering Intern, Qapp.ai

Remote — December 2025 – Present

- Building generative AI applications using state-of-the-art LLMs and prompt engineering techniques to deliver production-ready solutions.
- Developing and deploying AI-powered features using modern web frameworks, ensuring seamless integration with existing systems.
- Participating in agile workflows and code reviews, implementing best practices for version control and documentation.

### AI/ML Engineering Intern, Innominds

Remote — May 2025 – August 2025

- Implemented machine learning pipelines using Python and PyTorch, improving model accuracy by 75% through hyperparameter tuning and feature engineering.
- Developed RESTful APIs using Flask to deploy ML models into production, handling real-time inference requests.
- Participated in agile sprints and code reviews, following industry best practices for version control and testing.

### Technical Secretary, IEEE RAS MUJ

Jaipur — May 2025 – Present

- Directed technical documentation and engineering workflows for robotics and UAV development projects, ensuring quality standards across 5+ concurrent initiatives.
- Led software integration for autonomous UAV systems, implementing flight control algorithms and sensor fusion for real-time navigation.
- Organized technical workshops on embedded systems, robotics programming, and IoT integration for 100+ students.

### Head of UAV Design, IEEE RAS MUJ

Jaipur — July 2024 – May 2025

- Managed multidisciplinary team of 15 students in end-to-end design and development of UAV systems and hybrid VTOL drones using agile methodologies.
- Designed hardware-software integration frameworks for autonomous flight systems, implementing communication protocols and control systems.

## PROJECTS

### MedSecure – HIPAA-Compliant Medical Records Platform

*Next.js 15, TypeScript, PostgreSQL*

- Built secure healthcare platform with role-based access control (RBAC), JWT authentication, and encrypted data storage.
- Architected normalized relational database schema with optimized queries for efficient data retrieval.

### N.E.W.S – IoT Health Monitoring System

*React, Python, LoRaWAN, Grand Finalist - SIH 2025*

- Developed distributed system processing real-time sensor data from 50+ IoT devices with 99.9% uptime.
- Implemented ETL pipelines using Python to process water quality data, enabling predictive analytics for disease detection.

### Legally AI – Legal Research Automation Tool

*Python, NLP, OpenAI API*

- Engineered document processing system using NLP and LLMs, reducing case research time by 70%.
- Built scalable RESTful API with rate limiting and caching mechanisms for concurrent requests.

## ACHIEVEMENTS

### Smart India Hackathon (SIH) 2025 – Grand Finalist (Top 5 in India)

Competed at national finals among 890,000 students with IoT-based healthcare solution.

### EIBS 2.0 (East India Blockchain Summit) – Grand Finalist (Top 10 in India's Largest Blockchain Hackathon)

Demonstrated blockchain proficiency by developing a decentralized solution in a high-stakes national hackathon.

### Hacks by ACM MUJ – Finalist

Built collaborative problem-solving platform with WebSocket integration for real-time communication.

### Hackerzstreet by IEEE CS – Finalist

Created secure medical record exchange platform with end-to-end encryption and compliance features.
