

SHRESTH SENWAL

Engineering Intern — Full Stack AI Developer

✉ shresth.senwal@gmail.com — 📞 +91 9999885717 — [GitHub](#) — [Portfolio](#)

SUMMARY

Analytical software engineering student with proven experience in **full-stack development**, **generative AI architectures**, and **IoT systems**. Adept at translating complex business and technical requirements into scalable, secure infrastructure and automated workflows. Combines deep technical execution with customer-facing leadership and consulting experience. Seeking to leverage strong foundational networking, systems engineering, and enterprise solution-building skills in a Consulting Engineer trajectory.

EDUCATION

B.Tech, Information Technology

Expected May 2027

Manipal University Jaipur

Relevant Coursework: Computer Networks, Distributed Systems, Operating Systems, IoT Systems, Database Management Systems, Software Engineering, Object-Oriented Programming

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, TypeScript, C++, SQL, HTML/CSS
Frameworks	React, Next.js, Node.js, Express.js, Flask, PyTorch, TensorFlow
Developer Tools	Git, GitHub, Docker, VS Code, Postman, CI/CD, Jest, Linux/Unix
Technologies	Computer Networks, RESTful APIs, WebSockets, Microservices, RAG, MongoDB, PostgreSQL, OAuth, JWT

WORK EXPERIENCE

Consulting & Tech Capstone Intern, Deloitte USI

Remote — June 2026 – Present

- Analyzing complex business requirements to architect scalable enterprise solutions, aligning software systems with client strategic objectives.
- Interfacing with cross-functional stakeholders to drive technical discovery, risk assessment, and system design validation.
- Simulating end-to-end deployment workflows, optimizing systems infrastructure, and delivering technical recommendations to improve operational efficiency.

Generative AI Engineering Intern, Qapp.ai

Remote — December 2025 – April 2026

- Built generative AI applications using state-of-the-art LLMs, creating robust middleware layers to integrate model outputs into web applications.
- Designed and deployed API integrations using modern web frameworks, focusing on low-latency data exchange and reliable failure handling.
- Participated in agile workflows and technical code reviews, ensuring high standards for code quality, documentation, and scalability.

AI/ML Engineering Intern, Innominds

Remote — May 2025 – August 2025

- Implemented high-throughput data pipelines using Python, optimizing model training efficiency and feature engineering pipelines.
- Developed and deployed scalable RESTful APIs using Flask to serve models in production, handling concurrent network traffic efficiently.
- Documented deployment procedures and collaborated in technical design reviews, minimizing delivery friction across sprint cycles.

Technical Secretary, IEEE RAS MUJ

Jaipur — May 2025 – May 2026

- Directed technical documentation, engineering workflows, and system integration strategies for autonomous UAV networks and robotics platforms.
- Communicated complex architectural concepts to multidisciplinary teams, acting as the primary technical consultant for 5+ concurrent initiatives.

PROJECTS

PolyPact – Multimodal AI Paralegal Platform

Full Stack, REST API, LLMs,

- Engineered a state-driven "Case Container" model to build secure, isolated legal contexts and automated reasoning pipelines.
- Implemented Vision AI and Neural Graph architectures with advanced Retrieval-Augmented Generation (RAG) to automate complex document processing.
- Designed scalable RESTful APIs with rate limiting and robust caching to support multi-tenant, ultra-high-performance workloads.

MedSecure – HIPAA-Compliant Medical Records Platform

Next.js 15, TypeScript, PostgreSQL, JWT

- Architected a normalized relational database with role-based access control (RBAC) and encrypted transit layers for secure data exchange.

N.E.W.S – IoT Health Monitoring System

React, Python, LoRaWAN, Grand Finalist - SIH 2025

- Developed a distributed system processing network traffic and real-time sensor streams from 50+ IoT nodes with 99.9% uptime.

ACHIEVEMENTS

Smart India Hackathon (SIH) 2025 – Grand Finalist (Top 5 in India)

Competed at national finals among 890,000 students with an enterprise IoT-based healthcare routing and data system.

EIBS 2.0 (East India Blockchain Summit) – Grand Finalist (Top 10 in India's Largest Blockchain Hackathon)

Designed and presented a decentralized architecture solution addressing high-stakes data integrity and consensus under stress.
